

# Symphony-iQ

## for Collegiate Athletics

**Cleaner Air. Cleaner Surfaces. Healthier Athletes.  
Smarter Facilities.**

### The Challenge in Athletic Spaces

- High occupant density
- Elevated heat and moisture
- Constant equipment movement
- Increase risk of airborne and surface-level contaminants

**Traditional air systems were never designed to protect athletes in these environments.**

### The Symphony-iQ Advantage

**Athlete Health & Safety:** Actively addresses airborne and surface contaminants in high-intensity, high-contact environments.

**Performance & Recovery Support:** Maintains consistent, optimized environmental conditions that support respiratory health, endurance and recovery.

**Operational Efficiency:** Provides real-time visibility into environmental conditions across training, locker, and recovery spaces.

**Energy Optimization:** Supports smarter HVAC operation in large, high-demand spaces, reducing energy waste while maintaining peak performance conditions.

**Recruiting & Program Differentiation:** Positions facilities as high-performance, health-focused environments, enhancing athlete experience and competitive recruiting advantage.

### Simple, Hands-Off Operation

- Always-on autonomous operation
- No staff intervention needed
- Works continuously during training & recovery

**Protect athlete health and availability.**  
Enhance facilities without disruptive capital projects
