The Challenge in Educational Environments

- Classrooms are densely occupied environments where air quality directly imipacts student health, focus and attendance.

- Schools operate in aging facilities that often struggle to maintain consistent ventilation, temperature and environmental conditions.

- Parents and communities expect transparency around indoor environmental health and safety.

- Facilities teams are under pressure to deliver environments with limited budget and staff.

The Symphony-iQ Advantage

Symphony-iQ is a plug-and-play Environmental Intelligence engine designed to help schools create healthier learning environments.

It actively purifies air and surfaces, continuously monitors environmental conditions, and provides real-time insights that help administrators and facilities teams maintain safe, comfortable, spaces for students and staff.

- **Reduce illness transmission**
- **Increase cognitive performance**
- **Control odor & bacteria**
- **Ensure optimal humidity & temperature**
- **Sanitize equipment, desks and surface areas 24/7/365**

SYMPHONY-iQ

TEMPERATURE + HUMIDITY AUTOMATION

ACTIVE AIR & SURFACE PURIFICATION

ENVIRONMENTAL MONITORING

REAL-TIME INSIGHTS

- Plug-and-Protect Deployment
- No Construction
- No HVAC Shutdown
- No Classroom Disruption

Create healthier learning environments without disrupting the school day.
