

## The Challenge in Healthcare

- Healthcare-associated infections (HAIs) remain a persistent and costly challenge.
- Aging infrastructure limits real-time environmental visibility.
- EVS teams cannot be everywhere 24/7/365.
- Current solutions are often outdated and operate in silo's and lack scalability and real-time automation intelligence.

## The Symphony-iQ Advantage

**Reduced Infection Risk:** Supports infection prevention efforts by actively addressing airborne and surface containments

**Cost Avoidance:** Even modest reductions in HAIs can translate into significant cost savings and improved patient outcomes.

**Operational Efficiency:** Provides real-time visibility into environmental conditions, enabling faster response and reduced strain on facility teams.

**Patient Experience & Confidence:** Creates visibly safer, more comfortable environments that support healing and trust.

## SYMPHONY-iQ

TEMPERATURE + HUMIDITY  
AWARENESS & AUTOMATION

ACTIVE AIR & SURFACE  
PURIFICATION

CONTINUOUS ENVIRONMENTAL  
MONITORING

REAL-TIME INSIGHTS & ALERTS

- Plug-and-Protect Deployment
- No Construction
- No HVAC Shutdown
- No Patient Disruption

PATIENT ROOMS • ICU UNITS • INFUSION & TREATMENT CENTERS • WAITING AREAS & LOBBIES •  
NURSES' STATIONS & STAFF WORKSPACES • OUTPATIENT & SPECIALTY CLINICS

Enhance patient safety and operational performance, without disrupting care delivery. Pilot deployments available.
