

The Challenge in Hospitality

- Facility Management teams are stretched and capital retrofits are disruptive.
- Wellness is now a guest expectation
- Scrutiny over air, surface and sustainability practices is at an all-time high
- Current solutions are often outdated and operate in silo's and lack scalability and real-time automation intelligence

REAL-TIME INSIGHTS

The Symphony-iQ Advantage

Revenue Differentiation: Enables the introduction of "Health-Optimized Rooms," creating new premium offerings and opportunities to increase ADR and guest preference.

Operational Efficiency: Provides real-time visibility into room-level environmental conditions, enabling faster response, reduced complaints, and improved facilities performance.

Energy Optimization: Supports smarter HVAC operation through continuous monitoring and intelligent insights, reducing unnecessary energy use without impacting guest comfort.

Brand & Enhanced Guest Confidence: Reinforces a commitment to health, wellness, and sustainability, strengthening brand perception and influencing booking decisions.

- Plug-and-Protect Deployment
- No Construction
- No HVAC Shutdown
- No Guest Disruption

GUEST FLOORS & ROOMS • SPA & WELLNESS AREAS • LOBBIES, LOUNGES & COMMON AREAS • CONFERENCE & EVENT SPACES

Enhance facilities without disrupting operations.
Pilot deployments available.
